

Gleb Tutubalin

Junior Software Engineer | Test Engineer | QA Engineer

Carlow, Ireland | +353 87 434 2849 | glebtutubalin@gmail.com | github.com/GlebTut | linkedin.com/in/gleb-tutubalin-472926385

PROFILE

- Fourth-year Software Development student at South East Technological University (SETU), Carlow, Ireland, expected to graduate in 2027.
- Hands-on experience in software engineering, backend and tooling, IT administration, and web development, including a final-year project focused on branch coverage instrumentation for C programs.
- Strong in independent technical work, system thinking, documentation, and practical problem-solving, seeking an internship or junior role in software engineering, test engineering, or QA.

TECHNICAL SKILLS

- Programming Languages: Java, C, C++, Python, JavaScript, PHP, Bash/Shell, x86_64 Assembly (NASM)
- Web Technologies: HTML, CSS, React, Angular, .NET, AJAX
- Databases: MySQL, MariaDB
- Tools & Platforms: Git, Linux, Make, Gcov/LCOV, tree-sitter, StarUML, LibreOffice
- Concepts: Data Structures, Algorithms, OOP, Design Patterns (MVC, DAO), Agile/Scrum, AST Parsing, Branch Coverage Instrumentation

EDUCATION

BSc in Software Development

South East Technological University (SETU), Carlow, Ireland | 2024 – 2027

- Year 1 GPA: 79.75% | Year 2 GPA: 77.58% | Year 3 GPA: 70.83%
- Relevant coursework: Software Engineering, Advanced Data Structures and Algorithms, Operating Systems, Cloud Development, Assembly and C, Systems Analysis and Testing, Object-Oriented Software Development, Web Programming and Databases, Computer Networks, Digital Logic.

Higher Education Preparation Certificate | Professional English C1 | NFQ Level 6

South East Technological University (SETU), Carlow, Ireland | 2022 – 2023

- GPA: 83.91% | Classification: Pass
- Modules: English for Professional Communication, Introduction to Information Technology, Introduction to Mathematics, Study Skills, Cultural Competencies.

EXPERIENCE

Web Developer / IT Administrator Intern

Lombard Companion LLC, Russia | June 2024 – August 2024

- Developed and published the company website.
- Set up and maintained office IT infrastructure, including network connectivity, printers, internet access, and employee workstations.
- Supported the company's digital operations and assisted with basic online advertising setup.
- Provided user support and resolved day-to-day technical issues.

IT Administrator Intern

Megawatt LLC, Russia | June 2025 – August 2025

- Rebuilt and optimized the company's internal network infrastructure from the ground up.
- Integrated cloud storage solutions and configured connections to external servers and network printers.
- Deployed and configured new computer systems, ensuring reliable operation across the network.
- Configured and fixed employee account systems on office PCs.
- Provided technical support, resolved hardware and software issues, and maintained stable day-to-day operations.
- Supported network security and reliable connectivity across departments.

PROJECTS

C²obra – Branch Coverage Tool for C Programs | 2026 – Present

Technologies: C, Python, Bash, Make, Linux, tree-sitter, Gcov/LCOV | GitHub: github.com/GlebTut/c2obra

- Developed a branch coverage instrumentation tool for C programs as part of a research-focused final-year project.
- Implemented AST-based source code parsing using tree-sitter to detect and instrument branches such as if/else, while, for, and switch.
- Built a Python instrumentation pipeline that injects a custom C runtime library, generates branch hit counters, and produces HTML coverage reports.
- Designed the system architecture, UML diagrams, and supporting technical documentation.
- Evaluated the solution against TestCoCa, TestCov, and Sikraken using standardized benchmark programs.

AutoSphere – Garage Management System | 2025

Technologies: Java, MySQL, MVC, DAO | GitHub: github.com/GlebTut/Garage_Management_System

- Worked in a team of five to build a garage management system with invoicing and payment modules.
- Implemented DAO and service-layer patterns.
- Contributed to database schema design and optimization.
- Built features for customer records, vehicle history, invoicing, and payment workflows.

Auction System – Desktop Application | 2025

Technologies: Java Swing, MySQL, MVC | GitHub: github.com/GlebTut/Auction_System_Project

- Built a desktop auction application with lot management, bidding, and user authentication.
- Applied MVC and DAO architectural patterns.
- Designed a normalized relational database schema.
- Implemented input validation and role-based access control.

x86_64 Assembly Projects | 2025

Technologies: NASM, Linux syscalls, C | GitHub: github.com/GlebTut/Parameter-Passing-Example---68000-to-x86_64-Conversion, github.com/GlebTut/OS_PROJECT

- Developed low-level x86_64 assembly programs using Linux system calls.
- Implemented process management and OS interaction scenarios.
- Demonstrated understanding of CPU architecture, memory management, and low-level programming.

ADDITIONAL INFORMATION

- Martial Arts: Candidate for Master of Sport in Judo with competition and coaching experience; currently training in MMA.
- Languages: Fluent in English and Russian.
